DETAILED ACTION

Allowable Subject Matter

1. Claims 1-24 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 7 and 13 recite, among other features, a heater heating the liquid crystal panel, the heater including a plurality of heater electrodes, each of the plurality of heater electrodes being formed as a linear band aligned to be in parallel with a side of the liquid crystal panel and heater control means for controlling start and stop of heating by the heater, in such a manner as to keep a sensed temperature of the liquid crystal panel to be not more than $\pm 3^{\circ}\text{C}$ of a predetermined target temperature which is within a range between 33°C and 63°C , the sensed temperature of the liquid crystal panel being determined by sensing a temperature of a plurality of separate sections of the liquid crystal panel.

The cited reference, Cavanaugh et al (US 7,106,287), discloses a single heater electrode in a liquid crystal cell that runs along and is parallel to each side of the cell. The shape of the electrode is non-linear. The cited reference, Gaalema et al (US 5,694,147), discloses maintaining the liquid crystal material at a preselected temperature above the ambient temperature. The cited reference, Davis et al (US 5,027,111), discloses of keeping the medium at a temperature between -15° and 120°C . Therefore, the cited references whether alone or in combination do not disclose the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
